

ANIKET JAIN

Mumbai, India • +91 7218609882 • aniket.jain2023a@vitstudent.ac.in • [LinkedIn](#) • [GitHub](#)

PROFILE

ECE undergraduate at VIT Vellore with hands-on experience in Agentic AI systems, cloud technologies, cybersecurity, and product thinking. Passionate about building scalable AI-powered products, designing intelligent agentic workflows, and driving data-backed decisions. Proven leader managing cross-functional teams and large-scale technical events.

EDUCATION

B.Tech – Electronics & Communication Engineering (VIT Vellore)

Aug 2023 – Present

• CBSE XII: 80.2% • CBSE X: 97.2%

TECHNICAL SKILLS

AI / Agentic AI: Agentic AI Workflows, LLM Applications, Multi-Agent Orchestration, Prompt Engineering, NLP, Sentiment Analysis, AI-driven Decision Systems, AI Product Management

Product: Product Strategy, Roadmapping, Agile/Scrum, PRDs, KPI Tracking, OKRs, A/B Testing, Market Research, AI-powered Dashboard Design

Cloud & Dev: AWS (EC2, S3, IAM, CloudWatch, SageMaker), Python, C/C++, SQL, REST APIs, Git, Workflow Automation, SAP Integration

Tools: Jira, Confluence, Figma, Notion, Power BI, Wireshark, Metasploit, SQL map

EXPERIENCE

Product & AI Intern | JSW Paints

Jun 2026 – Jul 2026

- Studied end-to-end paint manufacturing processes and sensor ecosystems (flow, temperature, viscosity sensors), identifying automation improvement opportunities across production lines.
- Built **KPI Copilot** — an Agentic AI-powered interactive dashboard that ingests live SAP reports, auto-updates KPIs, and surfaces actionable insights across production, quality, and supply-chain metrics via a conversational AI interface.
- Developed an **AI-based Inventory Management System** leveraging agentic workflows to automate stock monitoring, demand forecasting, and reorder triggers, reducing manual overhead and improving inventory accuracy.

Projects Head | E-Cell VIT Vellore

Feb 2026 – Present

- Lead AI, automation, and product development initiatives; manage cross-functional student teams for end-to-end project delivery.
- Coordinate design, tech, ops, and marketing teams to streamline workflows and execute events for 800+ participants.
- Drive AI-focused product ideation applying Agile/Scrum and OKR frameworks to measurably improve team throughput.

Cybersecurity Intern | Code Decode Labs Pvt. Ltd., Pune

Jun 2023 – Jul 2023

- Conducted malware analysis, vulnerability assessments, and penetration testing using Wireshark, Metasploit, and SQLmap.
- Collaborated with dev teams to improve deployment security, system reliability, and secure software testing pipelines.

PROJECTS

Stock Market Sentiment Analysis Platform | AWS · Python · NLP · VADER · SageMaker ·

2025

CloudWatch

- Built VADER-based NLP pipelines for real-time financial news processing; deployed scalable ML workflows on AWS SageMaker with CloudWatch monitoring.

Skills: Python, VADER (NLP), Sentiment Analysis, AWS SageMaker, CloudWatch, S3, REST APIs, ML Pipelines

ADAS – Advanced Driver Assistance System | Python · OpenCV · Computer Vision

2025

- Developed lane-monitoring and obstacle-detection workflows using computer vision and sensor integration for real-time vehicle safety.

Skills: Python, OpenCV, Computer Vision, Real-Time Image Processing, Sensor Integration, Algorithm Design

LEADERSHIP & ACHIEVEMENTS

- Senior Core Member, IEEE Communications Society (ComSoc) VIT — led CTF competitions and hackathons with 800+ participants.
- Selected to represent India at an international platform (9th grade); awarded a fully sponsored educational trip to Rome, Italy.
